Reseller Park now in hall 25

Movement in the market and on the IFA fair grounds

This year's Reseller Park (RP) is located in hall 25 and is the biggest Reseller Park of all time!

After the combination of 2 separated platforms, (incl. own outdoor hall for the trading sector) the Reseller Park reached a size of 2000 m² and 70 exhibitors. In general, Messe Berlin relocated the themes – e.g. Telekom in hall 21. This change is due to the increase of different product sectors as e.g. mobile, the new wearables or home appliances/smart home. The Reseller Park is an essential marketplace of the CE-sector as there are exhibitors like Microsoft, JET Services, IT2U, Selectric, Intos Electronic and interesting neighbours such as Ingram Mobility, Huawei, ZTE and Phicomm as well as many new products which are directly presented by Chinese companies.

We look forward to welcoming you!

Yours,

Jan Nintemann

PS: RESELLER PARK for next year's IFA:
It is recommended that those who are interested in becoming an exhibitor for IFA 2016 talk to me now, during the fair in the Reseller Lounge.

As an official partner of Global Fairs for both IFA Reseller Park & CeBIT, I would like to welcome you and thank you for visiting the Reseller Park. You have now found our industry meeting place.

Whilst Global Fairs organises and supports the full area, the IPT Marketplace's focus has been to promote and attract the international trading industry. Through our B2B trade platforms, our annual trade convention and our industry marketing and networking we have now grown the number of exhibiting traders.

Our IPT, IGT & ICB team is dedicated to supporting the distributors, traders, brokers and resellers of mobile phones, consumer electronics and IT components worldwide. Our three industry B2B trade portals provide an excellent facility for you to trade more effectively by putting you in contact with each other and providing added value services to achieve a "one stop shop".

It was very natural for us to once again support Jan Nintemann to promote IFA Berlin for our 8th year of partnership, with this year having a dedicated area for traders – The IPT Marketplace.

Jan has created a unique and very effective platform for both exhibitors and visitors – he has united the industry during IFA week. Our partnership with Global Fairs has enabled this project to succeed.

We are also the proud organisers of the International Trade Convention – ITC. ITC 2015, held in Malta, was the 4th convention and boasted a record breaking attendance from delegates. At ITC the key buyers & decision makers from distributors & trading companies meet in a relaxed environment to network and enjoy focused time together in a very different atmosphere to a tradeshow.

If you have any questions, or need assistance with anything, whether it be networking, industry related or introductions, please feel free to approach our team at stands 38a and the outdoor IPT Marketplace. May I wish you a very successful tradeshow and an enjoyable time in Berlin.

We've supported Reseller Park every year for more than a decade because this idea for a trade-only meeting place for international buyers & sellers is the most important platform for doing business at IFA Berlin.

We felt then, as we do now, that IFA's biggest purpose should be to bring together buyers and sellers from the channel. And we're pleased that ResellerPark achieves that goal.

We publish weekly eNewsletters for dealers/resellers/ distributors in Europe and Middle East. We focus on international-level news & analysis.

- **Consumer electronics...**Gadgets...TVs... Accessories... Audio

THE RESULTS FROM IPT!”**

We have worked with IPT for one year now and are delighted with the work carried out so far. CyTec is doing a lot of business with cell phones and tablet-pcs so all work needs to be of the highest quality, which is what we get with IPT. They are responsible for helping us find new customers, advertise our goods and make trade effectively. IPT understand the high standards that our company have and are most efficient in supporting well within time limits. I would highly recommend working with them.
