A NEW MARKETPLACE INITIATIVE OF Europe's largest Smart Home Association

As SmartHome Initiative Deutschland e.V. we are not market players ourselves – our role is rather to support our members.

Smart Home Initiative Deutschland e.V. sees itself as a cross-sector federal association in Germany. In order to enlarge the opportunities for a presence on Smart Home platforms which are relevant for business, our Board of Directors resolved some time ago to organize its presence at fairs professionally in co-operation with Global Fairs TT-Messe (a well-connected exhibition agencySmartHome has reached the mass market.

Increasingly more consumers want to use smart products to increase the security of their homes, improve comfort and, of course, to also save energy. Systems for professional installers and products for self-installations are competing with each other on the one hand – yet on the other hand they complement each other. Which existing products can be upgraded? Which systems are interoperable?

The shared stand of SmartHome Initiative Deutschland e.V. is located in this area of interesting interplay and provides information for consumers, craftsmen, architects and specialist retailers to an equal extent.

WELCOME

Impossible to visit IFA without discovering the business opportunities, highlights & trends in the Reseller Park.

70 exhibitors from around the world welcome B2B-partners such as retail buyers, distributors and resellers!

INNOVATIVE TECHNOLOGY AND INNOVATIVE DISTRIBUTION CHANNELS for resellers, retail purchasers and international distributors

Dear IFA exhibitors and trade visitors,

It is often heard that a particular market has grown to be so clearly structured that new suppliers with new products have very little chance of success to gain access to the important sales channels with new highlights. But is this really the case?

In the Reseller Park, manufacturers and distributors come together and have found ways – despite established and over-saturated markets – to access the appropriate sales channels, which operate autonomously and have, and can also create, good affinity to specific products and segments.

In addition to well-known companies and brands, the Reseller Park is also home to numerous national and international niche manufacturers, specialist distributors and marketers for the CE and mobile accessories, and Smart home components.

This means it really is worth a visit to Berlin, the IFA – and now also the new ISP@IFA GLOBAL MARKETS which has almost 600 exhibitors from 16 countries and has been the largest supplier event in Europe right from the outset, located in the external STATION-Berlin – and, of course, also to the Reseller Park in Hall 25 ...

Yours

Jan Nintemann

20 YEARS EXPERIENCE IN ORGANIZING B2B CHANNEL PLATFORMS

ON WORLD LEADING FAIRS IN EUROPE

Where you can measure our success by the increase in both quantity and quality of trade visitors from the show

We are organizing business platforms as a show-within-a show at CEBIT Hannover and IFA Berlin that works best for companies that want to maximize contact with professional trade and system-integrate buyers within an event best known for special sectors and consumer attraction.

- Turnkey participation or custom-built stands
- Common business lounge with refreshments
- Powerful promotion to dealers, distributors and Systemintegrators
- B2B or B2B2C configuration and options
- Excellent service and organization
- Cost-effective participation
- Join brand-name manufacturers and world-class distributors

Contact us if you are interested in exhibiting at the following shows:

IT'S CHANGE THAT DEFINES US

In a market famous for its constant change, trade show organizers such as Messe Berlin have to keep IFA moving with the flow of technology. Two new Messe Berlin initiatives stand out for us:

IFA NEXT in Hall 26 is a global innovation hub bringing together researchers, industry professionals, start-ups and retailers for a dynamic transfer of knowledge, information and business ideas.

IFA GLOBAL MARKETS, at STATION-Berlin during Sept. 3–6th, is IFA's international trading platform for original equipment manufacturers (OEM), original design manufacturers (ODM), suppliers, component manufacturers and yet-to-be-discovered brands from all over the world.

Recognizing the changes in market trends, Global Fairs/TT-Messe will support both those worthy initiatives with pavilions- in addition to its traditional RESELLER PARK. And we, of course, will support Global Fairs/TT-Messe.

The **RESELLER PARK** in Hall 25 is a platform we've backed for all its 21 years, now an impressive must-visit collection of 70 manufacturers and distributors bringing in true innovations as well as traditional products.

At IFA NEXT, what today could be more important than the future of **SMART HOME**? And what better partners for this new joint pavilion in Hall 26 (IFA Next) could Global Fairs/TT-Messe pick other than Europe's own smart home associations?

This year, inside **IFA GLOBAL MARKETS**, we will also support Global Fairs/TT-Messe's new **ISP@IFA GLOBAL MARKETS**, an international suppliers park – as part of our response to the growing demand from distributors, retailers and etailers for private and white label sources. And, of course, for the underlying technology providers that fuel OEM/ODM – from chips to sensors to displays to software and more.

Please visit us there, at our Social Media Stand. IFA GLOBAL MARKETS runs between September 3rd and 6th at STATION BERLIN 7.2. Personally I will also be on stage in the SYMPOSIUM room, as moderator of the **IFA GLOBAL MARKET EXPERT TALKS**. Some of Europe's top experts in distribution and sourcing will join me on stage at IFA. Drop by and join in the conversation.

IFA 2017 promises more products, more technology and more executive insight than ever before.

And that's an example of the positive industry change that also defines how we work with Global Fairs/TT-Messe to bring more value to our audience both online and on the fair grounds.

Telecom Handel

TELECOM HANDEL [HALL 25 · LOUNGE]

Country: Deutschland
Contact: Mr Roland Bernhard
Email: bernhard@telecom-handel.de
Web: www.telecom-handel.de

Telecom Handel reports fortnightly in the newspaper and daily on the website on a cutting-edge, hands-on and sales oriented basis about new products and business strategies in the field of telecommunication devices and services. Telecom Handel mirrors the telco market and offers insights about all important topics to the point of branch related contents like home entertainment, mobile computing, IoT and smart home.

Telecom Handel's target groups are the classical telco- and mobile phone retailers, system vendors and the corresponding departments in electronic entertainment and multimedia retailers, computer and office equipment retailers (qualified target group dispatch).

Retailers will find in Telecom Handel exclusively investigated overviews on products and vendors. Furthermore, you will be provided with market reports, shopping guides, smartphone tests. Periodical readers' polls evaluate manufacturers, telephone companies and distributors and do thus round up the range of information for the telco branch.

IFA GLOBAL MARKETS EXPERT TALKS

Sept. 3-6th Station Berlin

ON PAGE 12-13 YOU SEE THE SCHEDULE OF "IFA GLOBAL MARKETS EXPERT TALKS"

An interview with Bob Snyder, Content Chairman

What should we look forward to during EXPERT TALKS?
First, we have excellent content partners in VDE and EEN who both have speakers on stage. And Amazon Business is running a very helpful workshop on how to get more B2B business (pre-registration requested).

GK Design Europe's Research Manager, Anouk Groen will present **FEARLESS: Trend Inspiration Forecast 2018**, a visual journey through the latest CMFD forecast (color material finish & design) and social trends (based on annual research.)

Dr. Bill Liu, Founder and CEO of Royole Corporation, joins us. He's a leading innovator and manufacturer of next-gen human-machine interfaces. His Moon 3D Virtual Mobile Theater already won a Gold Award in the European Product Design Award.

The You-VR & VONDERLAND presentation, **More than Reality - VR on Every Street**, talks about where VR is going, about multi-person VR experiences including eye-tracking, hand-tracking, a scent-generator, real time-engine controlled wind, heat, moving walls and hydraulic floors.

And, of course, we have our panel discussions with top experts.

Where can we find EXPERT TALKS at Station Berlin?
You can find us in the Symposium room, one floor up, near Hall 5 in Station Berlin. See you there! See the full speaker schedule on the web at... <http://bit.ly/2wEnumv>
